Sugar cane
Canne à sucre

6.1 SUGAR CANE BLADES
COUTEAUX POUR COUPEUSE DE CANNE À SUCRE

Benefits:

- Rapid blade change, with worldwide patent, which reduces changing time by 50%.
- Reduced risk of accidents due to cuts by blade.
- Universal: it does not require any disc base support or counter blade.

Characteristics:

- Special strength steel, resistant to cutting and wear.
- Special heat treatment.

Use:

- 3 different qualities for each type of soil
- RED, inPHInium for abrasive and high requirement soils
- WHITE, for normal soil conditions
- GREEN, for stony soils

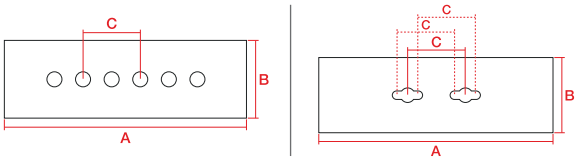
Avantages:

- Changement rapide des couteaux breveté mondialement qui réduit de 50 % le temps de changement.
- Réduction du risque d'accidents par coupure avec le couteau.
- Universel : aucun support de disque de base ni contre-lame n'est nécessaire.

Caractéristiques:

- Acier spécial résistant à la coupe et à l'usure.
- Traitement thermique spécial.

Utilisations:



15600 CC BASE CUTTER / 15600 CC COUTEAU DE BASE

Ref. Réf.		Positions	Number of edges Nb. tranchants	Grs.	A	B	C	
15600-5-CC-42	5	4	2	730	270	90	52	30
15600-5-CC-44	5	4	4	730	270	90	52	30
15600-5-CC-62	5	6	2	680	270	90	52	30
15600-5-CC-64	5	6	4	680	270	90	52	30

The angle of the edge in these references is 15º. However, Bellota also has an special range with 27º.
Range of blades adapted to different types fo soils and uses. RED, inPHInium for abrasive and high requirements soil. WHITE for normal condition of the soil. GREEN for hard and stony soils.

6.2 SUGAR CANE ADAPTABLE
CANNE À SUCRE ADAPTABLE

Characteristics:

- All parts are tempered, which improves performance and lifetime.
- Fan blades last 76% more others from competitors.

Use:

For CASE and JOHN DEERE harvesters.

Caractéristiques:

- Toutes les pièces sont trempées, ce qui améliore leur rendement et leur longévité.

Utilisations:

Pour moissonneuses de CASE et JOHN DEERE.
